

Manual Antenna Stand MAS 2.0

Technical data:

| Antenna height adjustable manually | 0.7 - 2.0 m |
|--|-----------------------------------|
| Total mast height | 2.2 m |
| Load capability | max. 6 kg (when balanced) |
| For long and heavy antennas a counter weight is required to balancing the load | |
| Depending on the distance of the antenna center of gravity | |
| Material of antenna stand | Plastic and reinforced fiberglass |
| Mast cross-section | 60 mm x 60 mm |
| Base (L x W) | 0.9 m x 0.75 m |
| Manual polarization | 0°/90° (vert./hor.) |
| Operating temperature | 10° C – 35° C |
| Total weight | approx. 25 kg |
| Movable with 4 wheels | |

Brief description

The MAS 2.0 manual antenna stand is especially designed for measurements in electromagnetic absorption chambers at a fixed measurement height. The MAS 2.0 has no metal parts (except for the wheels).

Antenna adapters for most commercially available antennas are available on request. All antennas during polarization rotate around their axis to eliminate any elevation errors.

Polarization change is performed manually. The antenna bat height can be adjusted manually.

Information presented enclosed is subject to change as product enhancements are made regularly. Pictures included are for illustration purposes only and do not represent all possible configurations.
